RENDER · COLOURS

Caparol Fassade A1

500 facade colours for your render

For render we work with the Caparol Fassade A1 fan deck: 500 colours specially composed for facades and architecture. From warm white and soft sand tones to grey, green, blue and deep accent colours. The colours are a selection from Caparol's large 3D-System plus and are arranged by colour family, from light to dark.

500 facade colours

46 colour families

1 finish in the colour of your choice

How to read the name

Each colour has the name of a colour family and a number, e.g. Flamenco 35. In this pdf the shades are grouped by family, from light to dark.

Colourfast and lightfast

In Caparol's premium facade finishes the colours stay beautiful for years: they resist UV light and hardly fade.

Dark colours on insulation

Dark facades heat up strongly in the sun. Colours with a light reflectance value (HBW) below 20 are marked with a dot: on external insulation we use a special system for them.

Choose with a real sample

A screen or printer never shows colours exactly. During the free site visit we bring the real fan deck, so you can see the colour in daylight on your facade.
